Dear Gov. Cooper,

In order to eliminate use of fossil fuel and move rapidly to end carbon emissions, we must act as Buncombe County has done (make a time limited goal of zero carbon emissions by a specified date. To accomplish this, there should be no justification for promoting any further burning of carbon fuels. There are inexpensive sources of energy, as in solar and wind, improved electrical grid and storage devices, of which I am sure you are aware. They can proceed as rapidly as political realities will allow. For the sake of those who come after us We hope that you will do all you can to oppose the proposed pipeline
